"Definite Evidence – 11th Sept 2001 Was An Inside Job"

By

Lloyd T Vance & Simon Gavin

Welcome to The OzBoy Files - "Definite Evidence – 11th Sept 2001 Was An Inside Job".

I was on the Internet reading the news from The Truthseeker site in England and come across the following evidence and story proving 11th Sept Was An Inside Job and thought it was worth writing about.

Many thanks to Christopher Bollyn for his research and investigations if you can help him and donate \$5 or \$10 dollars I am sure it will go a long way.

http://www.bollyn.com/about-christopher-bollyn#article_10540

Researchers and Investigators like Christopher Bollyn we owe all to without their tireless work and effort they expose crime and corruption within Government and help keep the bastards honest.

What your about to read is evidence and proof that 11th Sept 2001 Was An Inside Job, the real perpetrators left their finger prints trade mark for all to see.

This evidence and proof was and is covered up by authorises, that is the FBI and by mainstream media who refuse to report it instead parroting the Official story without any evidence to back them up.

The evidence and proof is also ignored by politicians in most western countries like the USA, Australia, Canada, England, Germany, France, Netherlands, Denmark, Italy to name a few countries.

The Zionist Jewish controlled media in all our countries make sure what I am about to expose never comes out.

So lets begin, the evidence and proof 11th Sept 2001 Was An Inside Job is right under our nose, in plain sight for all to see, but I like most people were to busy to notice because we were so upset crying all those people were dying in the World Trade Centre while the Punch & Judy show of crashing remote controlled planes into the Twin Towers was going on.

The evidence and proof is WTC 6

And before you try and explain away, WTC 6 was affected by the Twin Towers attack, the answer is wrong.

- There is NO WAY buildings explode by themselves?
- WTC 6 known as Customs House was fully emptied including the Vault prior to exploding?

- For WTC 6 to be fully emptied of workers and furniture prior to exploding proves inside knowledge, that somebody planned for the building to be bombed, rigged full of explosives?
- WTC 6 exploded at the same time 9.03am after a plane hit the World Trade Centre which was at 9.03am.
- The explosion of WTC 6 had absolutely nothing to do with planes hitting the WTC or by the collapse of the both of the Towers.

The real perpetrators bombed WTC 6, timing it at the same time as one of the remote controlled planes hit the World Trade Centre as cover for the heist which was about to take place and that was the theft of the Gold & Silver Bullion bars in the Vault below, which was blown at the same time as WTC 6 exploding.

Missing Gold

A King's Ransom in Precious Metals Seems to Have Disappeared

The basement of 4 World Trade Center housed vaults used to store gold and silver bullion.

Published articles about precious metals recovered from the World Trade Center ruins in the aftermath of the attack mention less than \$300 million worth of gold.

Two Brinks trucks were at ground zero on Wednesday to start hauling away the \$200 million in gold and silver that the Bank of Nova Scotia had stored in a vault under the trade center.

A team of 30 fire fighters and police officers are helping to move the metals, a task that can be measured practically down to the flake but that has been rounded off at 379,036 ounces of gold and 29,942,619 ounces of silver .

Reports describing the contents of the vaults before the attack suggest that nearly \$1 billion in precious metals was stored in the vaults.

A figure of \$650 million in a National Real Estate Investor article published after the attack is apparently based on pre-attack reports.

Unknown to most people at the time, \$650 million in gold and silver was being kept in a special vault four floors beneath Four World Trade Center.

An article in the Times Online gives the following rundown of precious metals that were being stored in the WTC vault belonging to Comex.

- Comex metals trading - 3,800 gold bars weighing 12 tonnes and worth more than \$100 million
- Comex clients - 800,000 ounces of gold with a value of about \$220 million
- Comex clients - 102 million ounces of silver, worth \$430 million
- Bank of Nova Scotia - \$200 million of gold

The Times Online article is not clear as to whether the \$200 million in gold reported by the Bank of Nova Scotia was part of the \$220 million in gold held by Comex for clients.

If so, the total is \$750 million, otherwise \$950 million.

There appear to be no reports of precious metals discovered between November of 2001 and the completion of excavation several months later.

Assuming that the above reports described the value of precious metals in the vault before the attack, and that the \$230 million mentioned by Giuliani represented the approximate value of metals recovered, it would seem that at least the better part of a billion dollars worth of precious metals went missing.

(It is not plausible, of course, that whatever destroyed the towers vaporized gold and silver, which are dense, inert metals that are extremely unlikely to participate in chemical reactions with other materials.)

An article in The Sierra Times suggests that gold was recovered from two trucks in a tunnel under 5 World Trade Center, giving rise to suspicions that the trucks were being used to remove the gold from the vaults before the South Tower fell.

Why is there this huge discrepancy between the value of gold and silver reported recovered, and the value reported to have been stored in the vaults?

There are a number of possible explanations, from outright theft using the attack as cover, to insurance fraud.

The FBI and mainstream media and politicians have refused to investigate this matter and completely cover up the missing Bullion why?

Understanding the Hidden Bombing of WTC 6

"We are benefiting from one thing, and that is the attack on the Twin Towers and Pentagon, and the American struggle in Iraq."

- Israeli Prime Minister Benjamin Netanyahu at Bar-Ilan University, April 2008

An amazingly callous Netanyahu told the New York Times on 9-11 (when early estimates were about 10,000 dead) that the terror attacks were "very good" for U.S.-Israeli relations.

His subsequent comments about how Israel was benefiting from 9-11 were made in Hebrew at Bar-Ilan University, a religious Zionist school, and were directed at an audience that is certainly well aware of Israel's involvement in the false-flag terror of 9-11.

These comments were obviously not meant to be translated for worldwide reading (the original article was published in the Hebrew language newspaper Maariv) and should be seen as a sort of public confession in which the leader of the Likud, Israel's right-wing extremist movement, sought to rationalize the Israeli false-flag terror atrocity on the United States.

Joe Lockhart, spokesman for President Bill Clinton, described Netanyahu as "one of the most obnoxious individuals you're going to come across - just a liar and a cheat.

He could open his mouth and you could have no confidence that anything that came out of it was the truth.

It's high time for an international arrest warrant to be put out for Netanyahu and Ehud Barak to be tried for terrorism and war crimes.

THE HIDDEN BOMBING OF WTC 6

The split-second precision of the bombing of WTC 6 reveals the sophisticated military planning of the criminal masterminds behind 9-11.

The blatant cover-up of this explosion, witnessed by hundreds of gagged members of New York's fire and police departments, is ample evidence of the complicity of the controlled media to hide the truth of what happened on 9-11, along with the mayors of New York City and the U.S. Government.

Contacted with the archives of CNN during the summer of 2002 to inquire about the precise time of their video footage of a huge dust cloud coming from a mysterious blast that appeared to have occurred at the U.S. Customs House (WTC 6) at about 9:03 a.m. -- the same minute that the second plane struck the South Tower on 9-11.

The raw video material has precise time markings, which they provided.

The mysterious explosion at the U.S. Customs House (WTC 6) occurred at 9:04 a.m. on 9-11, at exactly the same time as the second plane crashed into the South Tower.

As I reported in Christopher Bollyn article "What Caused the WTC 6 Crater?" of July 10, 2002, CNN confirmed to him that the mysterious blast had occurred at precisely the same moment that the second plane struck the South Tower

Despite the fact that the horrible events of September 11 occurred in broad daylight and were widely photographed, significant aspects of the attacks have been completely suppressed by a media blackout.

A massive explosion, witnessed by millions of television viewers on CNN, evidently devastated WTC 6, the 8-story U.S. Customs House, although no national newspaper or media outlet has said a word about it.

The unexplained blast occurred between the burning North Tower and the 47-story Salomon Brothers Building, known as WTC 7, immediately after United Airlines Flight 175 smashed into the South Tower, at about 9:03 a.m.

The explosion at WTC 6 was shown afterwards on CNN.

Because it not broadcast as it happened there has been some confusion about when it actually occurred.

The large amount of smoke seen cascading around the South Tower in the video led some observers to mistake the blast for a dust cloud from the subsequent collapse of the tower.

TIMING CONFIRMED

Christopher Bollyn contacted CNN to determine exactly when the footage was filmed.

CNN's Public Affairs Department confirmed that the explosion shown in the footage occurred immediately after the second plane had crashed into the South Tower.

When asked if the footage was taken at 9:04 a.m., the CNN archivist who could not give his last name, said, "That's correct."

When asked if CNN could offer any explanation about what might have caused the blast that clearly reached 550 feet, soaring higher than the 47-story WTC 7 in the foreground, the archivist said, "We can't figure it out."

When he revisited this subject in June 2009, he examined some photos by the late Bill Biggert that showed that WTC 6 had been badly damaged before the collapse of either tower.

He also discussed the discovery by Kurt Sonnenfeld, a FEMA photographer, now living in exile in Argentina, that the underground vault of the building had been cleaned out before 9-11.

This story is extremely important because it reveals that there was a criminal mastermind behind 9-11 who was able to time the explosion in WTC 6 to coincide exactly with the crash of the airplane into the South Tower.

It also reveals that the terror attack was designed to conceal the theft of the contents of the underground vaults - evidence of serious crimes and valuables such as gold.

This is identical to the Zionist terror bombing of Jerusalem's King David Hotel on July 22, 1946, during the British Mandate.

The King David Hotel was blown up by Zionist terrorists in a way that was very similar to the bombing of the U.S. Customs House (WTC 6) on 9-11.

The people who blew up the King David Hotel were known terrorists from the Irgun and Haganah.

The children of these terrorists are the current leaders of Israel.

Why do good law-abiding Jews continue to support these terrorists?

Jabotinsky, Begin, Sharon, and Netanyahu are very much like Bar Kochba and his Jewish Zealots of the past - fanatics who led their people to destruction.

The King David Hotel served as headquarters for the British forces, and housed the evidence that would have resulted in many of these Zionist terrorists being hanged.

The destruction of this evidence was the primary reason for the bombing, which was carried out by Irgun and Haganah terrorists.

The commander of the Irgun terror gang from 1943-1948 was Menachem Begin who later became Israel's sixth prime minister in the 1970s and 1980s.

The head of terror operations for the Irgun was Yerucham Livni from Grodno, father of Israel's former foreign minister Tzipi Livni (who is currently wanted for war crimes in Britain).

The children of these Zionist terrorists from the 1940s are the leaders of Israel today.

The Zionist terror bombing of the King David Hotel in July 1946 was ordered by Menachem Begin and approved by David Ben Gurion.

Eitan Livni, chief operations officer for the Irgun terror gang had been arrested in April 1946 and was in prison at the time.

Menachem Begin, a Zionist from Brest-Litovsk, was arrested by the NKVD in 1940

Begin, the arch-terrorist of Zionism, is Netanyahu's mentor and idol.

There are no limits or laws to constrain such fanatics.

When Netanyahu became prime minister on March 31, 2009, Begin's son Benny sat right behind him.

Netanyahu's father was executive secretary for Ze'ev Jabotinsky, the founder of the Irgun and Haganah - and the Zionist terror group that became the Likud party.

The Zionist-controlled media in the United States and Britain have ignored the evidence of the huge explosion that destroyed WTC 6 as the plane crash distracted cameras and onlookers.

This was the plan.

It is like a circus where the attention of the audience is controlled by the use of spotlights that illuminate one act while the rest of the arena is in darkness.

In this respect, the bombing of WTC 6 is like the huge debris field that is about one mile from the small crater where we are told the plane crashed in Shanksville.

The public's attention is focused on the twenty-foot crater while the real evidence is kept hidden from the prying eyes of the press.

The following photographs and analysis by Jack White, professional photographer, reveal that WTC 6 was bombed at 9:04 on 9-11 and that the controlled media is complicit in the criminal cover-up of the truth.

Jack White's 911 Photo Studies

<http://www.911studies.com/index.html>

Were you watching when it began?

The only comparable event was when I saw Jack Ruby shoot Lee Harvey Oswald on live television in 1963...and again in endless replays till the horror was burned into our national psyche. This time, instead of a Sunday morning, it was a Tuesday morning much like any other workday. My wife was getting ready to go to work. Since my office was at home, I was propped up in bed reading the morning newspaper. It was 7:45 a.m., Central Time. The Today Show was on the TV in the background, and it suddenly drew my attention as Katie Couric paused and stammered something like "I'm told there is a breaking news story... a plane has crashed into the World Trade Center...let's go now to live coverage..." The live NBC view from Rockefeller Center looked somewhat like this CNN shot:

An airplane had crashed into upper floors of the north WTC tower. No fire... but lots of black smoke. In shock I watched rest of the day, little knowing that the event was the start of an improbable mystery far greater than the JFK assassination.

The improbable mystery begins

The improbable official presidential reaction

The first crash was at approximately 8:45 a.m. according to a CNN timeline. At that time President Bush was in his limo enroute to a Florida photo-op at Booker Elementary School. Sources say Bush was informed of the crash while in the limo. He himself later on two occasions said he SAW the first crash ON TELEVISION (in the limo?). He arrived at the school at 8:55 and began a photo-op reading a story to children about a pet goat. At 9:06 aide Andy Card whispered a message to him about the WTC. After a moment's pause with a bewildered look, Bush continued to read the goat story with the children until 9:16 a.m. Thirty minutes elapsed before he took any action. He went to another room in the school and read a prepared statement for the television cameras. He then left the school, lingering outside for more photo-ops with teachers and students.

The improbable official story of what happened

From the CNN timeline: "4 p.m.: CNN National Security Correspondent David Ensor reports that U.S officials say there are good indications that Saudi militant Osama bin Laden...is involved in the attacks, based on new and specific information developed since the attacks". Just like the Kennedy assassination...the "perpetrator" was named immediately! Only this time, he had 19 arab "suicide pilots" armed with small knives hijacking and crashing four giant jetliners! A preposterous "official story"!

8:45 a.m., plane hits north tower

The 3-second fire that brought down WTC 1

French documentary photographers brothers Jules and Gedeon Naudet were filming a segment in New York on September 11 when a loud airplane noise overhead caused the cameraman to pan to follow the sound. The first two frames capture the plane as it impacts the North Tower. As an explosion occurs, third frame, the camera zooms in and catches a huge fireball, fourth frame. In the fifth frame, the fireball has diminished, and in the sixth frame, the fire is virtually out as smoke rises. In the seventh frame, the smoke and fire are about gone, showing the gaping slash in the north face of the tower. The entire sequence lasts just a few seconds, and the part showing the intense fire LASTS ONLY 3 SECONDS, and it is mostly outside the building. After that, all smoke came from the burning interior...yet the official story is that intense fire melted the building steel structure to cause the collapse!

Before the collapse, a temporary survivor stands in the gash made by the plane, giving lie to the official story of an inferno of great heat and intensity.

9:03 a.m., plane hits south tower

Everyone in the world near a TV set saw an airplane hit the second WTC tower at 9:03 a.m. To help you understand 9-11, the next pages will show this crash from various views, because VIEWPOINT is crucial to understanding unexplained events. Note that as the plane at top right struck the south with a giant fireball, the view of the south tower from this point was blocked by the north tower!

9:03 a.m., plane hits south tower

Virtually ALL the jet fuel burns in the air OUTSIDE of the building!

If the fuel mostly burned on the outside of the building, the official "towering inferno" story cannot be true!

You gotta know the territory . . .

understanding the WTC

To understand the photos of 911, you must know all of the buildings, their locations, and the viewpoints of the various photos. "You gotta know the territory!" This page will help.

You gotta know
the territory . . .

understanding the WTC

Understanding the locations of these four buildings is crucial to understanding 911 photographs

It took weeks of studying maps and photos of lower Manhattan to memorize the maze of buildings there. To understand photographs of the events of 911, you must know the exact relationship of each of these buildings above to one another, especially that Building 6 is adjacent to Building 1, across Vesey Street from Building 7.

Mystery explosion of Building 6

The North Tower was hit at 8:45; the South Tower was hit at 9:03.

At 9:04 CNN televised a significant explosion between the North Tower and Building 7.

Since both towers are still standing, the explosive cloud was not caused by collapse of either WTC 1 or WTC 2.

Mystery explosion of Building 6

Timing and location of explosion shown

Search of thousands of photos yielded the one at upper right, taken from Hudson river level, that virtually matches the CNN helicopter view that was shot from a higher angle. Comparison shows that BOTH towers are still standing at the time of the mystery explosion, so the CNN rising dust cloud cannot be related to either tower collapsing, and the cloud is clearly separated away from the base of the north tower. The cloud is not seen in the Hudson River photo, when only the WTC1 has been hit, and is seen in the CNN frame only after WTC2 has been hit BUT BEFORE IT COLLAPSES. Indeed, the CNN FCC log shows the explosion ONE MINUTE after the second building was hit. On the computer enhanced image at bottom, the CNN frame is overlaid in position, showing that it is at Vesey Street, which separates WTC7 and WTC6, and far away from the twin towers. Who would notice a ground explosion with the building tops afire?

Mystery explosion of Building 6 update

Update: new CBS video shows exact timing of explosion

New York researcher Stephen St. John in April found this brief CBS video clip which shows the beginning of the dust cloud from the WTC6 explosion as it begins to move down Vesey St. It occurs at the same moment that the second plane impacts (yellow square). The CNN frame is one minute AFTER the impact, so the CBS video is one minute earlier. Unfortunately, the video catches only a small part of the cloud in the lower right corner (red circle) as it begins, but it is enough to be unmistakable, and in the right place.

Locating the explosion at street level

This map clearly shows that the view above looks south on West, past Vesey Street, to WTC6 and WTC1.

Telephone Building places blast at West and Vesey Streets...the location of WTC6, the 8-story Customs House!

The NBC frame above clearly shows a gigantic explosion blasting outward onto West Street from the Customs House...WTC Building 6. The smoke and dust cannot be coming from the North Tower in the background, or from the South Tower more than a block away which is blocked from West Street by WTC3, the Marriott Hotel. This ground level NBC frame (note logo at lower right) appears to definitely show the identical event seen in the CNN frame shown previously, in the same location. Therefore, one minute after the second plane hit WTC2, while onlookers were distracted by the events at skyscraper levels, a massive blast tore apart WTC6...an explosion which could not have its origin from the events high above. Explosives in the building? Most likely!

Dust clouds distinctly are different events

9:04 a.m.

One minute after South Tower is hit, a large dust cloud erupts between WTC1 and WTC7.

Supporters of the "official story" claim that the 9:04 CNN explosion above is a dust cloud caused by the collapse of the South Tower (WTC2). But this is false, as examination of the two frames above shows. The 9:04 explosion cloud is seen to be at Vesey Street, between Building 7 (marked 7) and WTC1 (North Tower)...the location of WTC6. Previous pages have shown that at this time the South Tower is STILL STANDING, a block farther south beyond the North Tower. The second frame shows that WTC2 collapsed from the TOP DOWN, and no dust cloud reached ground level immediately. When the dust cloud did reach ground level, it spread out immediately all over lower Manhattan, as seen at right from the same viewpoint. It is impossible that the two frames are of the same event. They show TWO different events!

10:05 a.m.

One hour later, the South Tower begins collapse from top down. WTC2 (south) is far away from WTC7.

An analysis showing the two different events - one hour apart

JACK WHITE'S 911 STUDIES

Biggert photo shows Building 6 damage

New York photographer Bill Biggert snapped this copyrighted photo of the fall of the south WTC tower just minutes before he lost his life photographing the collapse of the north tower seen at upper left. At right it is cropped and enlarged to show closeup the only known photo of WTC6 during the events of 911. The time is known very precisely...as the south tower collapsed, and before the north tower's collapse. Biggert's photo shows that Building 6 at that time had already suffered major trauma to the exterior, with soot above broken windows, drapes dangling outside and a yellow glow that may be fire inside. The damage is quite evident when compared to a pre-911 view of the building (inset at right). Computer contrast enhancement shows a dramatic difference from the pre-attack building photo, lending credibility to stories/photos of explosions in Building 6, even though it had not been hit in the attack, and contrary to the official story.

The Biggert photo looks south down West Street. The pre-911 photo of reference (pre-attack) looks west from West Street, and has been flipped horizontally for comparison.

The Biggert photo shows the pre-damaged WTC 6 as the South Tower is pulverized with super-thermite.

Locating the explosion at street level ²

Gaping hole in Vesey Street face of Building 6 before either tower fell.

Building 6 was at the corner of Vesey and West (traffic lights) between Building 7 and the North Tower. This recently discovered photo shows firemen responding to an explosion and fire in Building 6 before either tower fell. How do we know that? Both towers created huge clouds of dust when they came down; the North Tower was adjacent to Building 6, and the South Tower was a block away. There is NO DUST in the street by the ambulance, so NEITHER TOWER HAS FALLEN, yet Building 6 is shown to have already exploded, and firemen are spraying water on it. Spectators stand in the intersection of West and Vesey, which they could not have done if either tower had fallen. According to the official story, Building 6 was damaged by falling debris from the North Tower. But this photo shows the massive damage to the building BEFORE the North Tower collapsed, giving lie to the official story. It also shows a huge hole on the side of the building facing away from the source of any debris.

Dust clouds distinctly are different events

9:04 a.m.

One minute after South Tower is hit, a large dust cloud erupts between WTC1 and WTC7.

Supporters of the "official story" claim that the 9:04 CNN explosion above is a dust cloud caused by the collapse of the South Tower (WTC2). But this is false, as examination of the two frames above shows. The 9:04 explosion cloud is seen to be at Vesey Street, between Building 7 (marked 7) and WTC1 (North Tower)...the location of WTC6. Previous pages have shown that at this time the South Tower is STILL STANDING, a block farther south beyond the North Tower. The second frame shows that WTC2 collapsed from the TOP DOWN, and no dust cloud reached ground level immediately. When the dust cloud did reach ground level, it spread out immediately all over lower Manhattan, as seen at right from the same viewpoint. It is impossible that the two frames are of the same event. They show TWO different events!

10:05 a.m.

One hour later, the South Tower begins collapse from top down. WTC2 (south) is far away from WTC7.

Locating the explosion cloud source

X marks the spot where the dust cloud came from ... BUILDING 6.

Eight-story Building 6 has a giant explosion crater "X" in the precise location that ground level photos show the dust cloud being ejected westward between buildings, rising upward from ground level !

WTC6 was at the corner of West and Vesey Streets, just north of WTC1 and just south of the NYC Telephone Building. WTC7, which also collapsed mysteriously, was just east of the telephone building, and across Vesey Street from Building Six. The NBC frame at upper left shows a massive dust cloud blasting westward BETWEEN WTC1 and WTC6, as shown by the yellow arrow above. A huge crater seen in the middle of the building (X) seems to be the point of origin of the dust cloud. The crater in the building was 8 stories deep.

Looking at the Building 6 crater

Aerial photos of Building 6 show a great crater in the middle of the building 8 stories tall.

Built of steel and concrete, Building Six was not hit by an airplane but developed a huge crater. It was evacuated but did not burn. Building One, the North Tower, did not collapse and fall on it. WTC1 was seen still standing at the time of ground level photos showing an explosion at the location of Building Six, so falling debris did not hit the building. Building Two was on the other side of Building One, which shielded it from any WTC2 debris. If not hit by plane, fire, or falling debris, WHAT CAUSED THE GIANT CRATER?

The center of Building Six, ALL 8 STORIES OF IT, is seen to be missing; not just collapsed, MISSING, BLOWN AWAY. If it had just collapsed, the collapsed portion would be evident within the crater. A massive explosion is the only answer.

Satellite imaging shows lingering heat

Thermal image

SOUTH TOWER
NORTH TOWER
BUILDING 6
BUILDING 7

Taken on September 16, 2001 by NASA thermal imaging satellite and available on the US Geological Survey website is the image at left which shows residual heat under the locations of the fallen WTC buildings. The image shows that five days after the buildings fell (and for many days thereafter), molten steel in the basements with temperatures more than 2000 degrees persisted in the basements of WTC buildings 1, 2, and 7. Building 6, however, shows no signs of high temperatures in its basement, despite the immense hole blasted into the sub-basements, indicating an explosion without high residual heat in the fallen debris and basements.

According to reports, temperatures of "molten steel" in the tower basements persisted for weeks. The melting point of structural steel is 2750 degrees Fahrenheit. No temperatures of WTC jet fuel fires could have reached that in the tower fires. Building 7 had NO uncontrollable fire, but still had residual heat. Building 6, which had a huge internal explosion, had NO residual heat.

TWO 10-story craters in 8-story building!

...and they're empty!

Computer enhancement shows TWO deep craters, and BOTH ARE EMPTY. Had Building Six merely collapsed, huge debris piles would be expected in the lower levels. Not only are there no piles of debris, the craters seem to go very far below the level of Vesey Street, appearing to expose a basement floor! The only possible way this could happen is that both craters were blasted from the bottom upward, expelling ALL debris up and outward...as seen in the video frames on the previous pages. It is believed that all WTC buildings had double basements, which means that from top to bottom, these two craters in the 8-story building are 10-stories deep! Conclusion: TWO explosions occurred, under cover of the distraction of the impact of the second aircraft...deep in the sub-basement of WTC6. Since the north tower had not collapsed, it is impossible that these craters were caused by falling debris. Since WTC6 was not hit by a plane nor falling debris and did not burn, what other explanation is possible but EXPLOSIONS?

Computer penetration of the dark pit shows the individual floors and a lack of debris in the basement. Eight floors of collapsed materials should have caused a stack of wreckage very high.

The controlled demolition of Building 7

Less than 1% of public knows that a THIRD WTC building collapsed

Ask any hundred people how many skyscrapers collapsed on 9-11 in the New York event, and 99% will say TWO, the twin towers. Ask the same people whether they know that WTC7, a 47-story building (left) also fell on 9-11 a few hours after the other two...at least three TV networks televised the collapse...and fewer than one person in a hundred will know what you are talking about! They will even dismiss your query as a "conspiracy theory"! Click on the links below and become informed!

At 5:20 p.m. slightly damaged Building Seven collapsed:

- > It had not been hit by an aircraft
- > It had not been hit by significant falling debris
- > It had not suffered any massive fire
- > It had suffered no known structural damage
- > It was far away from the buildings which fell earlier
- > It fell within its own footprint like an implosion
- > It fell at the rate of a gravity free fall, like an implosion
- > Photos show puffs of smoke like a planned implosion
- > Planned implosions take many weeks of preparation
- > The building owner told the NYFD to "pull it"
- > TV networks were notified it would be brought down
- > Tenants were almost all "sensitive" government offices
- > No steel skyscraper in history had collapsed like this
- > The official government report covered up the cause

CBS video

at 5:20 p.m.
1.4MB - mpeg

36-second video clip shows Building 7 from an elevated vantage point to the distant northeast. Dan Rather comments that it looks like a controlled demolition.

CBS video

at 5:20 p.m.
1.7MB - mpeg

9.6-second video shows the Building 7 collapse from a vantage point only about 1000 feet to the north. Note the smooth and fast vertical fall.

NBC video

at 5:20 p.m.
1.5MB - mpeg

9-second video shows the Building 7 collapse from a vantage point about a mile to the northeast on West Broadway. Smoke still lingers from earlier events.

The Mystery of WTC 6

One of the key questions about 9-11 is What happened to WTC 6?

This building was evidently damaged prior to the collapse of the South Tower and appears to have been devastated by an explosion that occurred simultaneously with its demolition.

Christopher Bollyn revisits the photographic and video evidence of the mysterious explosion at WTC 6 in my latest article, The Mystery of WTC 6, in the [9-11 section](#).

The photographic record indicates that WTC 6 was severely damaged before the first tower fell.

So, what really happened to WTC 6?

The infrared image shows a huge crater in the center of WTC 6 (lower left).

This building had been damaged before either tower fell.

What blew the huge and deep hole in WTC 6?

Was it exploded from below at the same time as the South Tower was demolished with super-thermite?

That appears to have been the case.

So there you have it the proof and evidence 11th Sept 2001 Was An Inside Job, the camera doesn't lie only the mainstream media lies and politicians.

Thank you for reading The OzBoy Files and don't forget our book The Truth About 11th Sept 2001 And How It Was Done we name all the main players involved in the attacks.
